## Course Outline

### Module 1: AI and the Future of Government Work

- Identify the drivers of AI in the public sector.
- Explore current and emerging types and use cases for AI at all levels of government.
- Identify challenges and risks unique to AI-enabled service delivery.
- Evaluate early 'quick win' opportunities for mission-driven innovation.

### Module 2: Strategic Leadership and Talent Management for the AI-Era

- Explore a strategic model that aligns AI innovation with public impact.
- Evaluate AI projects based on mission value, feasibility, and risk.
- Identify emerging skills/competencies/roles in AI.
- Redesign traditional roles to leverage AI-augmented workflows.

### Module 3: Leading Change while Fostering Engagement and Trust

- Apply change management models to overcome resistance and lead cultural change during AI adoption.
- Map stakeholders and engage them early to build buy-in.
- Examine responsible AI principles of trustworthy AI within a mission-focused context.
- Establish verification processes to mitigate technical risks and model hallucinations.

### Module 4: Executive Decision-Making and Action Planning with AI

- Apply frameworks to build institutional accountability for AI systems.
- Standardize the executive decision-making process for AI-informed actions.
- Draft a formal AI governance policy tailored to specific agency requirements.
- Construct a tactical 90-day roadmap for pilot project implementation and monitoring.
