

Analytical Thinking (LEAD) Course (Self-Paced)

This course aims to enhance participants' ability to analyze complex problems, think critically, and make informed decisions. It covers topics such as logical reasoning, data interpretation, problem-solving methodologies, effective communication of analytical insights, and leveraging technology and tools for data-driven decision-making. The course equips learners with the essential skills and frameworks necessary to approach challenges systematically and think analytically in various personal and professional contexts.

Group classes in Live Online and onsite training is available for this course. For more information, email onsite@graduateschool.edu or visit: <https://sdfm.graduateschool.edu/courses/analytical-thinking-lead>
